Materials

- 2 Small Gold Spiral Cage
- 2 two-inch gold head pins
- 2 earring wires
- 4 Four mm cat's eye beads, color of choice
- 2 Identical round beads, your choice, measuring 10 - 14 mm (Any larger than this, and you'll need to use two large Spiral Cage!)

Tools for wire wrapping:
Flat nose and chain nose pliers

Skills Needed for this project:
Basic wire wrapped finished loop

Directions

1. Take one of your main beads, and spread the middle rings of the spiral cage by hand until you can pop the bead into the center.
2. Rotate the bead until the two holes are aligned at top and bottom with the north and south pole of the spiral cage.
3. Slip one cat's eye on the head pin, then slip the head pin through the south pole of the spiral cage and up and out through the north pole. Put on the second cat's eye bead.
4. Using standard wire wrapping technique, make a loop to attach to the earring finding, and finish is with a nice wire wrap.
5. Attach to your earring finding. Repeat to make the second earring. Enjoy your "out of this world Saturn's (Ear) Rings"!
